Thermal film LINEN for lamination

Category: [Lamination Film](#)

Availability: **estimated time of delivery 10.06.2025**
code: **266**

Price: 0,00€

Technical specifications

Core: 3 inch
Material: BOPP film
Surface: Linen
Type: Dry film
Quantity: 1 roll
Width: 320 mm, 490 mm, 630 mm, 690 mm
Length: 2000 m

Short description

Thermal Linen series is a partially acrylic coated, fineline structured, biaxially oriented polypropylene foil; the backside is coated with EVA Hotmelt.

The EVA needs some time for optimal bonding. The time for bonding depends on the used base material and should be tested before further processing. The thickness of the film is 35 µm (+/- 5 %); the foil can be used for materials of various kinds. The optimum processing temperature of the laminating roll is between 100°C and 115°C.

- scratch-proof
- good tear resistance
- scentless
- better separability
- better planarity
- better readability, even of small writings
